
Second Warwick Sea Scouts

Marc Gadsby our Group Scout Leader is intending to attend either on his own or with a couple of Scouts,

He has sent me a picture of the outboard which has been attached to the safety boat Winston. This outboard was a higher specification and more expensive than originally intended so only one outboard could be afforded. This model can provide greater tow capacity and speed. for dealing with incidents on the water. The life of the second outboard that was part of the original plan has been extended. The engine after attachment to Winston has been used in all of our water based activities, rowing sailing kayaking and canoeing.
