

Banbury Road

Proposed one way pedestrian flow from the roundabout at Bridge End/Myton Road to carry pedestrians over the bridge all the way to the pedestrian crossing. Signage to direct pedestrians to be installed at either ends of the footway, with directional arrows on the ground.

Where the road spits into 3 lanes it take the left hand lane out (through routes) and enable barriers to be installed to give more room for pedestrians and insert a temporary cycle lane.

Key:

- One way pedestrian flow
- Temporary cycle lane
- Footway Extensions
