

Friends Of Warwick Station

The Friends of Warwick Station were most grateful to receive a grant from Warwick Town Council to enable us to purchase bat/bird boxes to install at Warwick Station.

After much research and discussion, a number of boxes were purchased – of different sizes, design and composition.

These have now been put up at various locations at and around the station, giving much needed accommodation for the local nesting birds/bats following quite a number of trees being taken down after a storm, and to counter the effect on nesting tree dwellers by any further de-forestation/development.

We are monitoring their use, and if the project proves successful, may want to add more to the Station environs.
